

On September 1, the action "Single Day of Safety" starts in Belarus

These days, targeted preventive measures will take place to prevent emergencies, offenses and crimes, as well as training in behavior in emergencies, accidents, and first aid.

The tasks of the "Single Day of Safety" are the development of a culture of life safety in society, carrying out educational work with the younger generation and promoting safe living conditions for the population.

Within the framework of the "Single Safety Day" there will be open days, exhibitions, preventive actions, talks in labor collectives and other events.
