

On April 18, the Polotsk CMMC will hold a single day for checking blood pressure devices for the population (individuals)

In the last decade, doctors have recorded a significant "rejuvenation" of heart attacks and strokes, the risk zone includes not only the elderly, but also people over the age of 35. Therefore, it is very important to monitor your health, including the state of pressure in the circulatory system!

Therefore, it is very important to monitor your health, including the state of pressure in the circulatory system!

On the day of the action, the specialists of the Center will receive citizens to control the output parameters of household blood pressure monitors.

For individuals FREE OF CHARGE!

We invite you to check blood pressure devices at the address: Novopolotsk, Zavodskoy passage, 32.

from 9:00 - 12:00, from 12:30 - 15:30
