

The action "Verification in one day" has become a good tradition of the Polotsk CSM"

On October 17, as part of the events dedicated to the World Standardization Day and the Day of Standardization in the Republic of Belarus, our center hosted the "Verification in One Day" campaign.

The action was attended by enterprises and organizations of the region of various forms of ownership: from individual entrepreneurs to manufacturing enterprises and agriculture.

On the part of agricultural enterprises, the service of verification of instruments for measuring the concentration of alcohol vapor in the exhaled air (alcotests) was in the greatest demand.

Individual entrepreneurs handed over trade scales for verification. For industrial enterprises and social enterprises, verification of measuring instruments for electrical quantities (current transformers, electric energy meters, electrical meters, etc.) was carried out.

We invite you to participate in the promotions and events of our company, do not forget to subscribe and follow our news!
