

FOR SAFETY TOGETHER

On June 6, before the big summer holidays and as part of the events dedicated to Children's Day, the children of employees of RUE Polotsk CSMS and their parents, activists of the NGO BSJ Gosstandart visited the educational security center of the Ministry of Emergency Situations.

With the help of a practice-oriented lesson and an interactive quest, the children learned how to call emergency services, avoid dangers and act correctly in case of unforeseen situations.

In the simulated environment of an ordinary apartment, the guys found violations of fire safety and learned how to act correctly in case of a fire. The smoke maze made it possible to work out evacuation from a smoky room.

In a separate area where natural hazards are represented, we got acquainted with the safety rules for making a campfire, detecting dangerous objects, during thunderstorms, and also in reservoirs.

The children and their parents learned about the dangers that can lie in wait for them at home: on playgrounds, on the roadway, and how to avoid them.

The tour turned out to be informative and useful
